## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-14, drawn to compositions comprising a glycoprotein matrix and ubiquinone, classified in class 424, subclass 439.
- II. Claims 15-48, drawn to methods of preparing an ubiquinone-containing composition, classified in class 426, subclass 72+.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used not only to make the claimed product, but can also be used to make a composition comprising a glycoprotein matrix and a mineral. (See US 09/906576).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. (37 CFR 1.143)
